REPORT SUMMARY

This report investigates the sales, gross margin, and factors impacting customer satisfaction across different product categories and geographical locations. Results can help executives, marketing managers, and sale representatives to evaluate the current operation process and create short-term strategies to improve customer experience.

Average Gross Margin

6.3

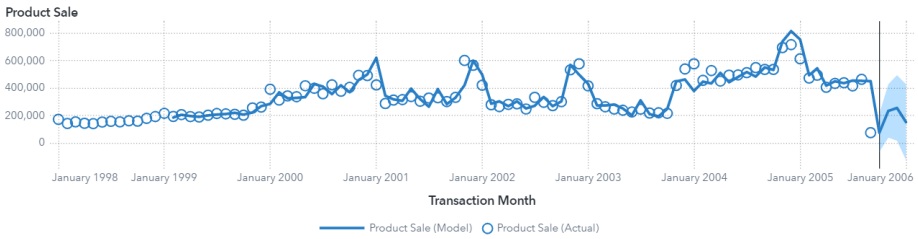

Facility Country: Peru

Product Sale

785K

Facility: GBMANCHE0115

Summarizations of gross margins and product sales

View details of gross margins and product sales across locations, comparisons of product sales and gross margins over time between countries/continents, and brands. This helps identify market trends and target potential markets.

Product Sales and Forecasting

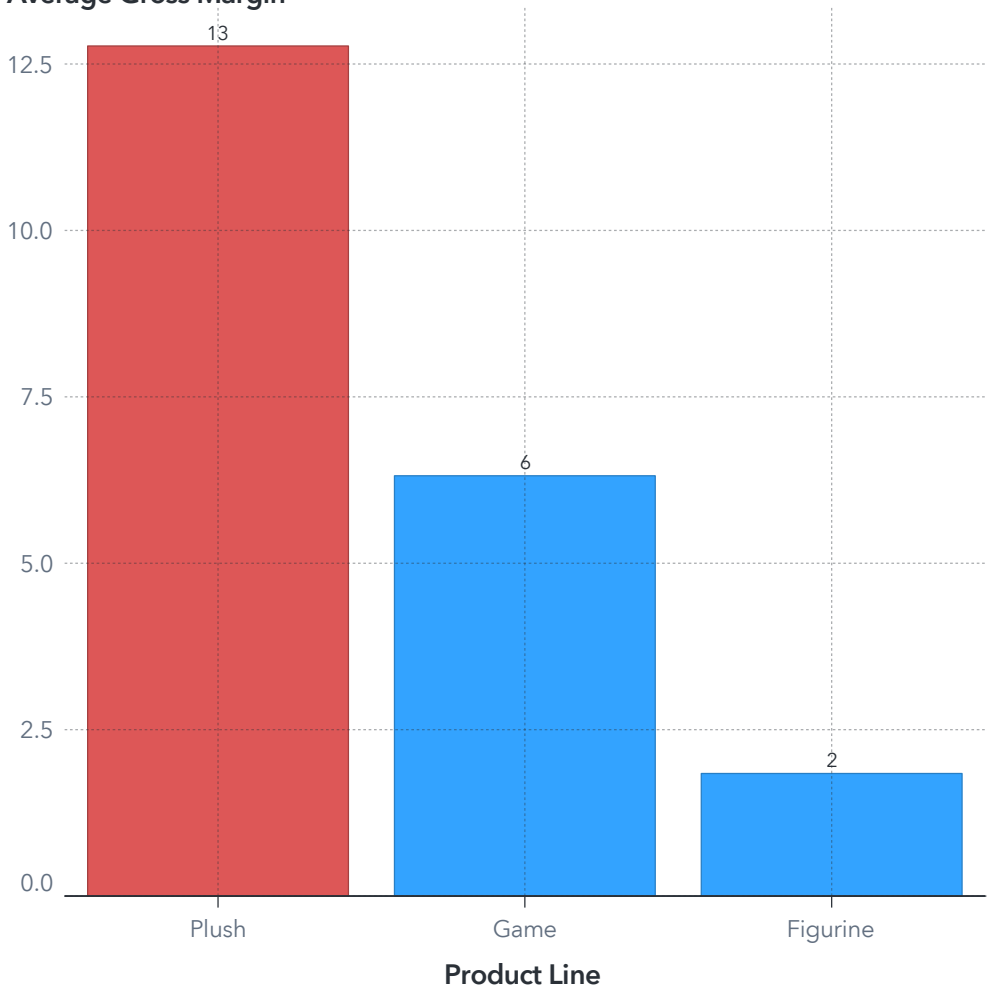

View details about Product Sales by geomap, including the Average Customer Satisfaction towards products. The drillable geomap can be used to compare sales across locations, the average customer satisfaction is emphasized among locations. A 4-month forecasting for Product Sales helps in preparing short-term business strategies.

Customer Satisfaction and Influential factors

View details about Customer Distance, including Customer Distance over time, Customer Distance distribution. Customer Satisfaction is also analyzed by identifying key factor(s).

Dependent Variable	Algorithm
Product Sale	ARIMA: Product Sale ~ D = (1,12) NOINT

Forecast Summary

The forecasting object uses statistical trends in your data to predict future values. It automatically tests multiple forecasting models against the specified data items and then selects the best model for each one.

The selected model for Product Sale is ARIMA: Product Sale ~ D = (1,12) NOINT, displayed with a 95% confidence interval. A 95% confidence interval is the predicted data range that will contain future values of Product Sale with 95% confidence.

Historical values of Product Sale are displayed as markers only, without a line. The chart displays predicted values (hindcast) as part of the forecast line. Some forecasting models include delayed effects, in which case the hindcast will not begin at the start of the MONTH axis.
